

Entrainement aux constructions géométriques des pupilles

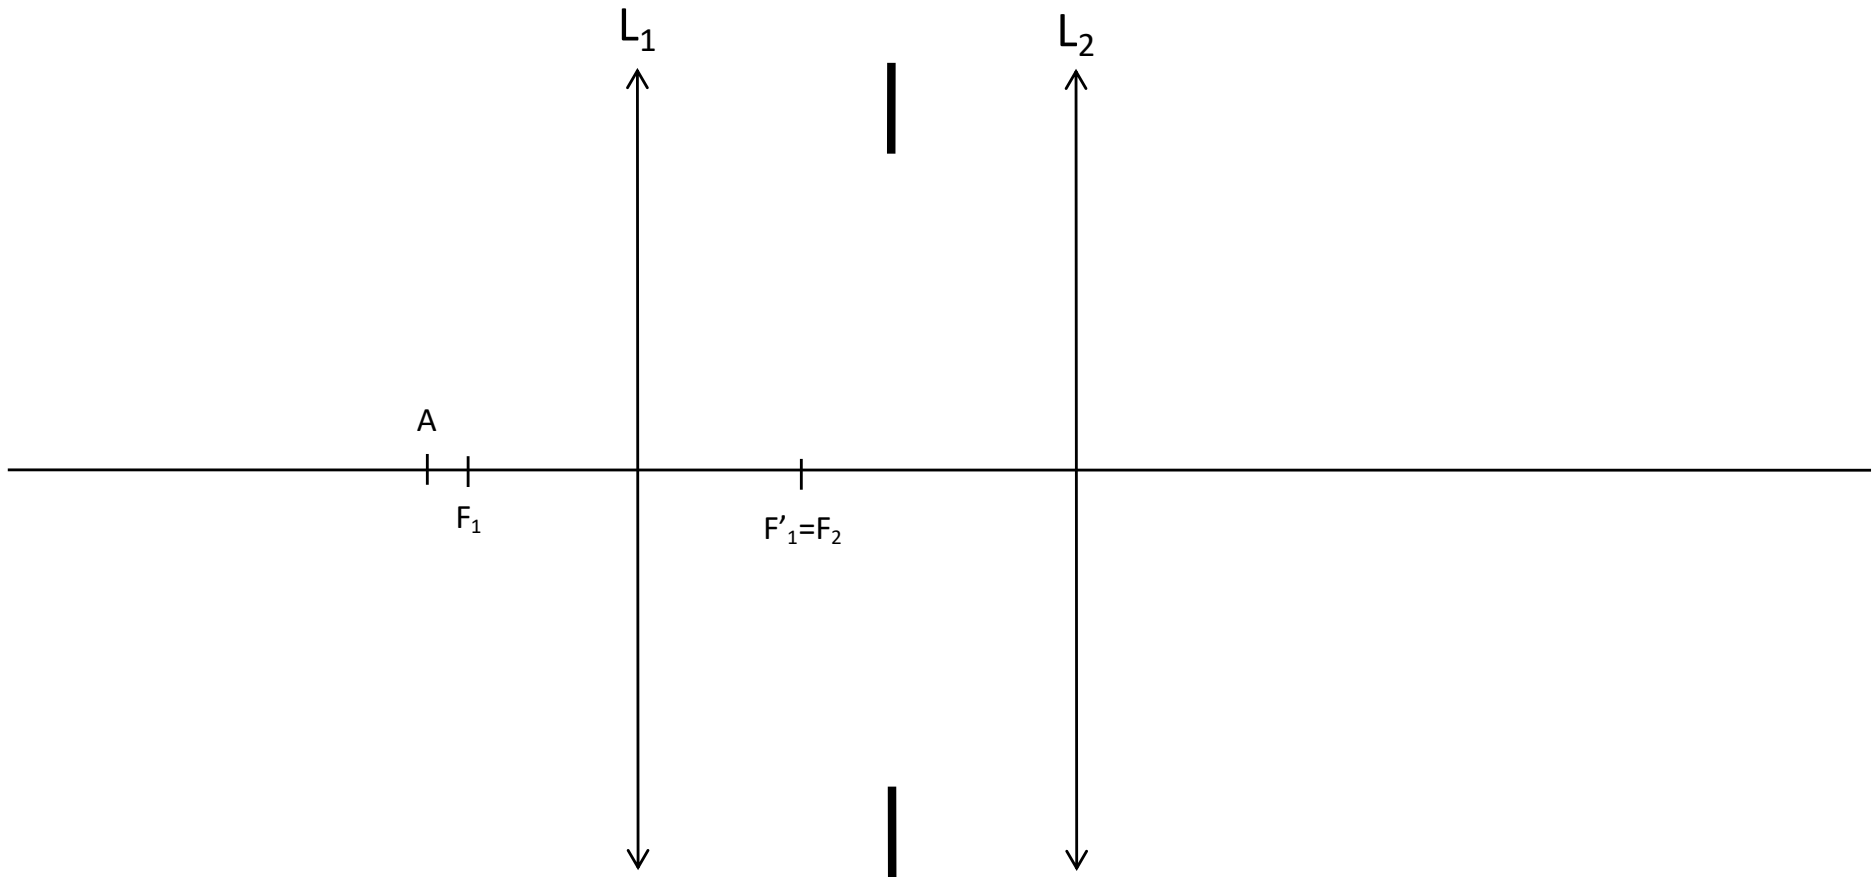

- Si le diaphragme d'ouverture (DO) n'est pas mentionné, il faut le déterminer.
- Positionner les pupilles d'entrée et de sortie.
- Tracer deux rayons s'appuyant sur les deux bords de la pupille d'entrée, et traversant tout l'instrument provenant de l'objet ponctuel (A) positionné sur l'axe.
- A_∞ signifie que le point est positionné à l'infini sur l'axe.

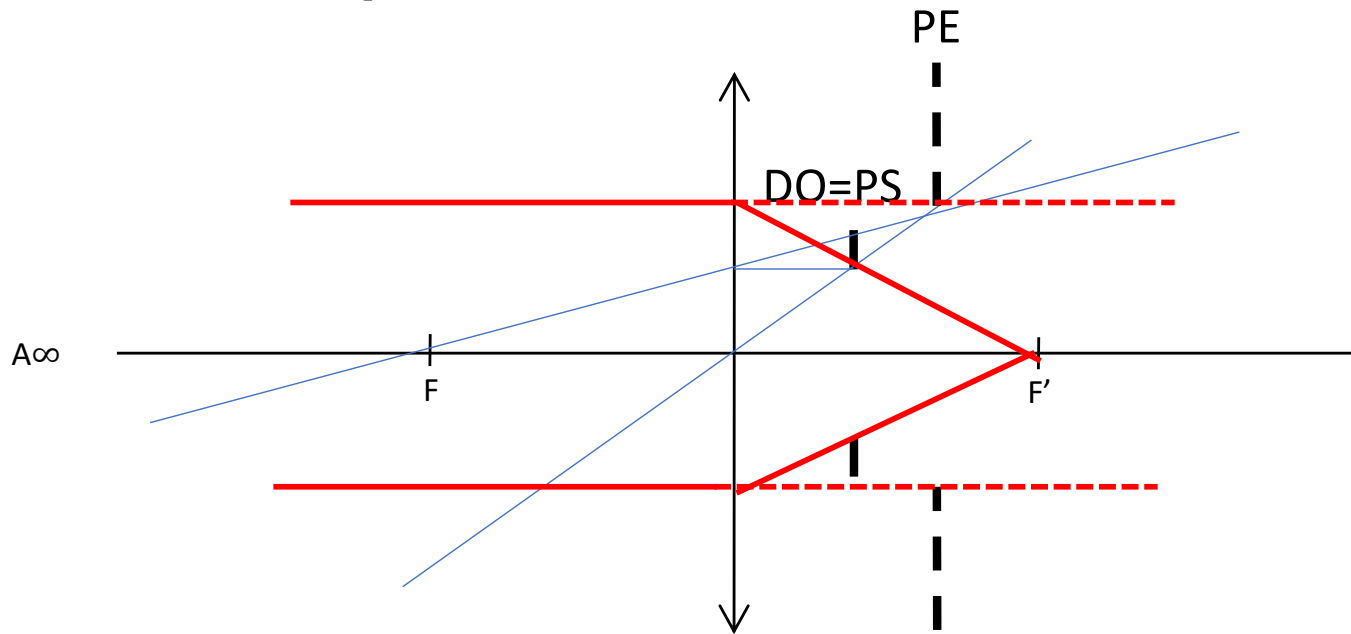

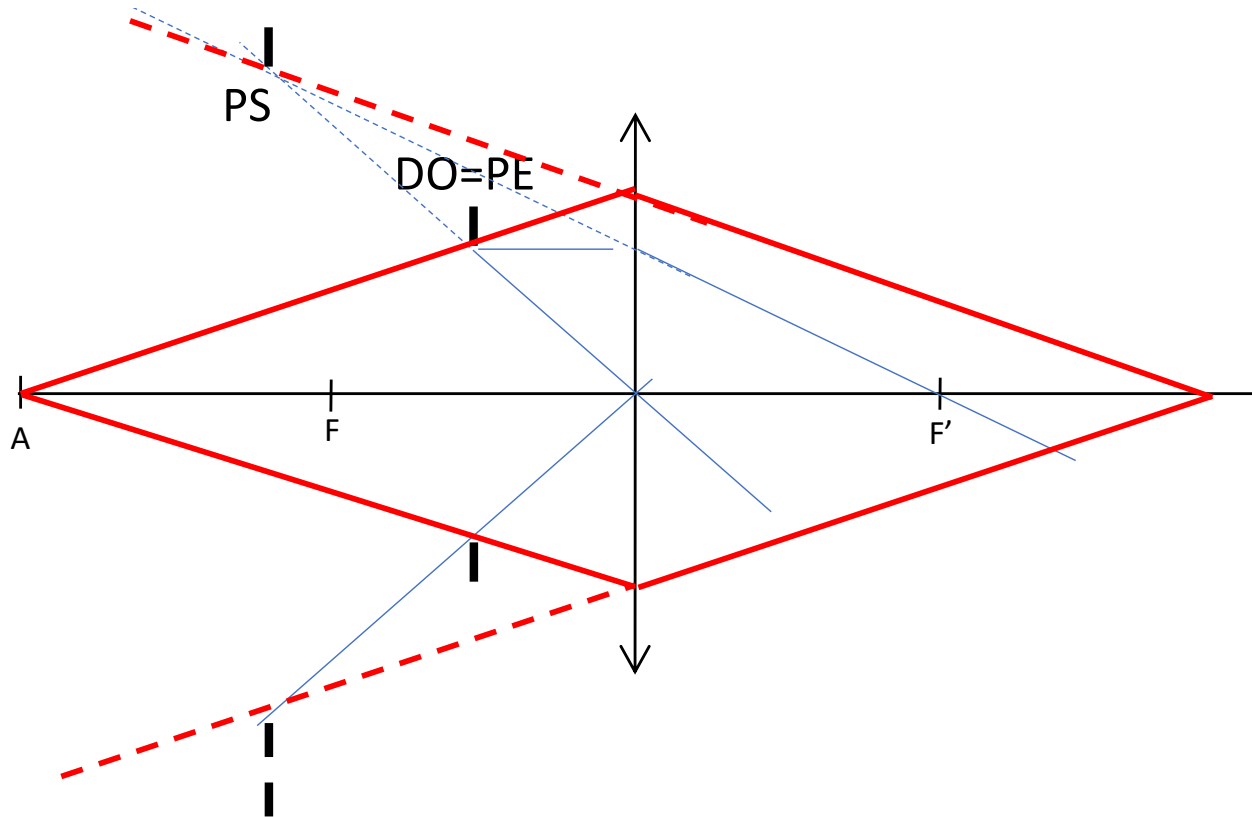

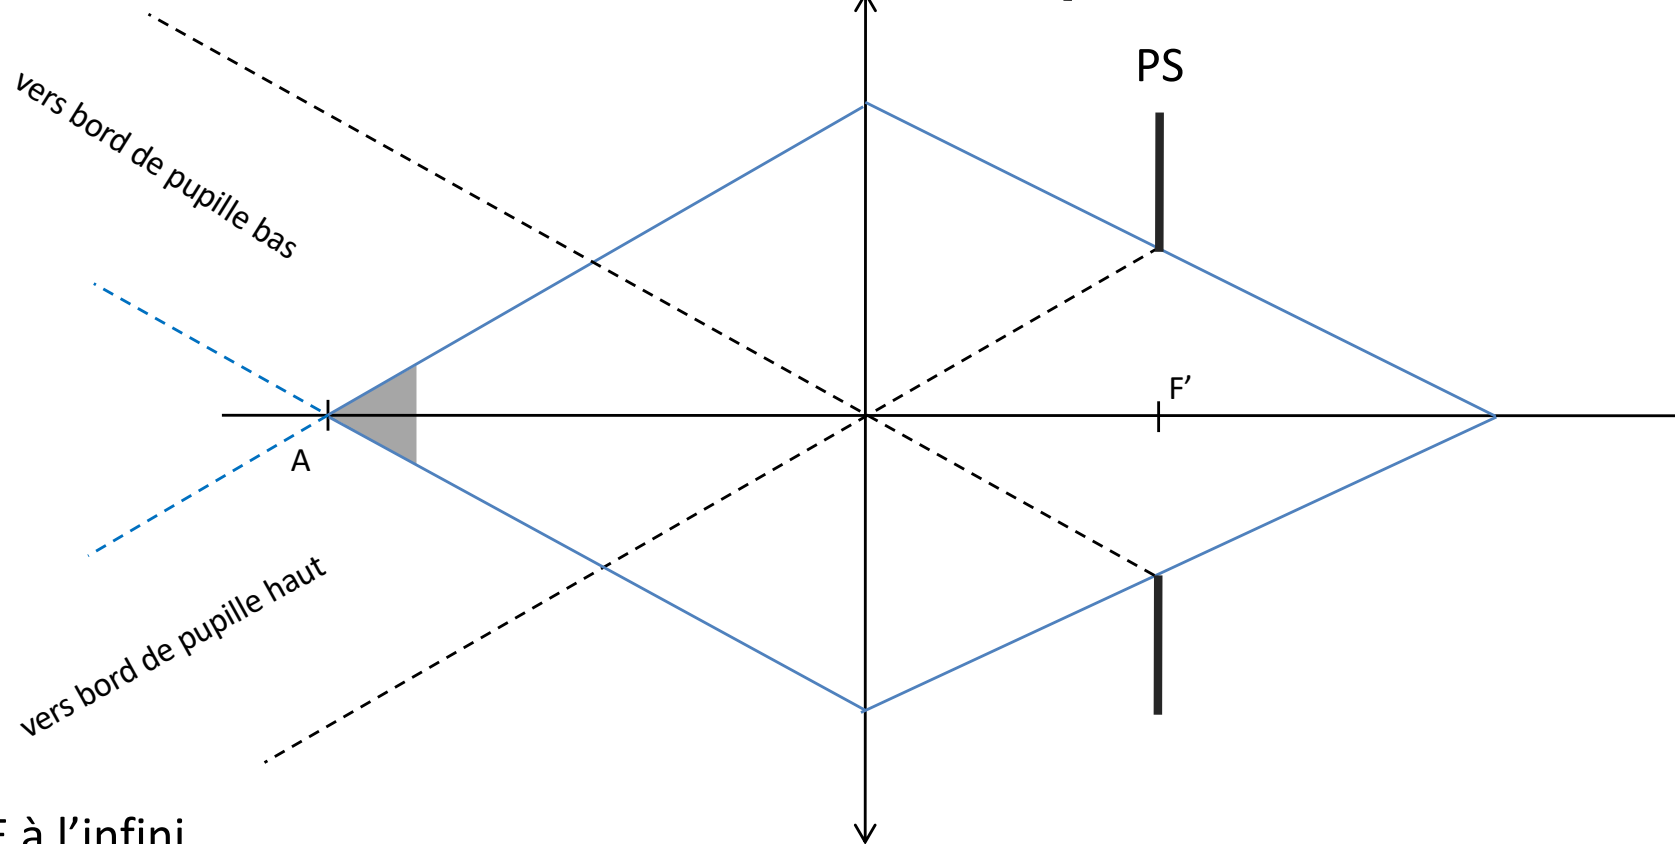

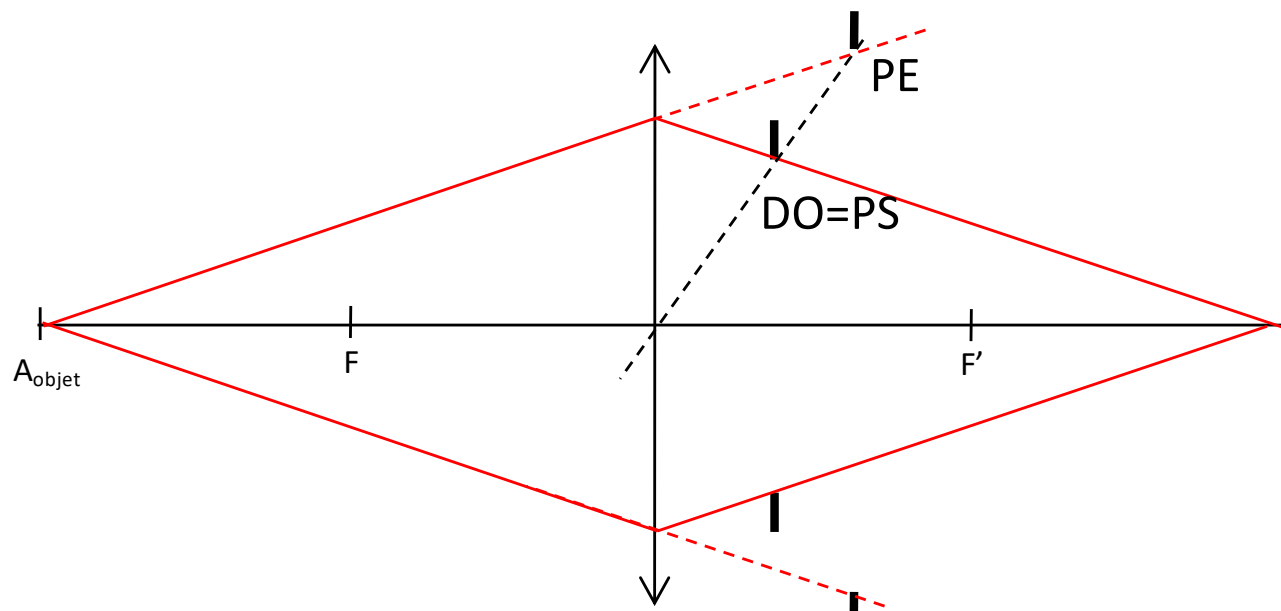

CORRECTION

PE à l'infini
